### GRANT COUNTY

Compliment by the Bureau of Immigration of This Territory.

A Brief Resume of the Work. The Bureau of Immigration, through its efficient scoretary, Max Frost, of Santa Fe, has just issued a handsome handbook of 344 pages, showing the resourcees, climate, geography, geology, history, statistics and future prospects of this Territory up to December 15, 1893. The work is embellished with tine engravings of the principal cities, mountains, valleys, mining camps, ranches, fruit farms and the numerous beautiful scenes and pleasure resorts which abound in this salabrious climate and future oldorado of the southwest.

A flattering tribute is paid to Grant County's wealth producing resources, her incomparable sanitary advantages, in 1891, at Los Angeles in 1893 beautiful scenery, broad ranges, bright, rapid rivers and enterprising people. We are credited with 200,000 head of United States—for to-day the cattle and numerous flocks of sheep upon our ranges; an annual production of \$1,000,000 in gold bullion and \$800,000 in silver ore, besides rich mines of lead, effort to obtain a worthy result st copper, opals, turquoise and other rare and valuable rematones.

We find the following in regard to Silver City:

ed at the foot of Pinos Altos, in the beau-iful Chihuahua valley. All the northern half of the county and parts of Socorro county and Arizona are ditional Irrigation Congress willbe rectly tributary to it, and it outlits dozens of surrounding camps. It lies at the end of a branch line of the Santa Fe road, and esjoys the advantages accru-ing to every large supply depot. Its banks, court bouse, hospitals, stores, public schools, hotels and other build-ings of a public and semi-public charac-ter would do credit to an eastern county O. R. S. O. R. S. Its water-works, lying about two miles and territories. or in the case of from town, assure the city not only of a the District of Columbia, by the good and pure supply of water, but, as President. there is a normal pressure in the fire hydrauts of 144 pounds to the inch, imhydrants of 144 pounds to the inch, immunity from the ravages of that dangerous element is certain. The water is pumped to a high reservoir by powerful machinery. It is taken from a tunnel which drifts across bed rock the full width of the valley. Under anything like ordinary, circumstances the supply is more than ample. Building material is very cheap as the surrounding mountains furnish lumber and stones of the least characters.

This method of developing a vater supply is worthy of a complete and technical description. Space however does not permit this. The water is stopped on the bed rock by sub-drains. The location is in a wide swale or shallow valley leading down from the Pines Altos towards Silver City. No water whatever runs on the surface. This underdrainage is an important factor in the economic development of the arid west. Silver City is a nomible example. Not only has she an ample supply for domes. only has she an ample supply for domes-tic and sanitary purposes of a large city, not dependent on chance showers, but through her pumping system she is re-lieved as much as possible from danger

The court house, the hospitals, the fine blocks that line the business streets, the churches, the commedious and comfortable hotels, of which there are four, give the city a metropolitan air. The salubrious climate makes good the local clain as a sanitarium. Situated at about 5,000 fest eieration, at about 35 des rees 15 seconds north latitude, prodes rees 15 seconds north latitude, pro-tected by encircling mountains, all the conditions are perfect for the preserva-tion of health or the restoration of the invalid to sound physical existence. The springs are early and winters mild, while the summers are never torrid. The lat-itude is the same as that of the north-ern coast of the Gulf of Maxico, but the heat is tempered by an elevation of heat is tempered by an elevation of more than a units above the sea. The air is exempted, and the influence of the pine forests is felt like balsom to every breath. The invalid who settles here will find his interest in life reviving. He will mix with a brainy, cultured popu-lace, and in a short time will find himlace, and in a short time will find him-self discussion business. He will find ground cheap and material plentiful to build a home, to which purpose the uni-versal hospitality of the people impel him, and in a short time he will feel himself a useful member of a growing and thriving community. Silver City has a wonderfully bright future.

Dr. Price's Cream Baking Powder World's Fair Highest AwardNational Irrigation Congress.

By the authority of the national executive committee, the fourth National Irrigation Congress is hereby called to meet in the city of Albuquerque, N. M. for the four days beginning September 16,

The present year is proving to be the most remarkable in the history of American irrigation. It has seen a wonderful awakening of popular interest in the cause throughout the east, resulting in the organization of most potential forces for the purpose of cooperating with the western people; the enactment of well considered irrigation laws in eight states, and the creation of administrative systems in five of them; the recognition of the pressing nature of the problem by the departments of interior and agriculture under whose direction a national board of irrigation has been formed from officials in various departments of the government.

These splendid evidences of the triumphant progress of the irriga-tion cause demand a large repre-And Silver City Paid a Handsome sentative and effective session of the irrigation congress in 1896. A further reason for such a gathering is the fact that the presidential campaign of 1896 will be maugurated previous to the assembling of another session of this body, and that it is thus necessary to formulate at Albuquerque the demands which the friends of irrigation will desire to make upon the great political parties of the nation.

In view of the nature of the oppurtunity, a program of extraordinary variety, interest and importance will be arranged, and it is anticipated that this session of previous convention at Salt Lake United States-for to-day the effort to obtain a worthy result st Albuquerque.

The Chicago Audubon Society. The county seat is Silver City, situated at the foot of Pines Altos, in the Congress at Denver, Colorado, cruelty. In a word, the object of this comparatively new and nuique organisation of men and women is the protec-

tion of birds. To this end a monthly meeting is hold at the Athenseum. So extensive has become the killing this paragraph: of birds for feminine fashion that the subject is attracting widespread attention among ornithologists. The Chicago Andubon society, however, claims to be condemnation of the use of birds for

millinery purposes. read a paper on "Amateur Ornithology," followed by musical numbers. The audience was made up mostly of women who practice what they preach by not wearing birds in their bonnets, the killing of the bird.

"There are 8,000,000 birds slaugh-tered anunally in the name of fashion," the society. "As an organization we propose to be instrumental in the protection of birds and in time introduce such bills in the legislature. At present pending which relates to the game laws

"The Chicago Andubon society is, I believe, the only organization of the kind in the United States," she continued. "There was one in New York, but it has disbanded."

was organized several months ago .-Chicago Times-Herald.

The Girls of Today.

That the American girl is making rapid strides in the direction of a higher degree of physical perfection is shown by the work going on in the gymnasiams of schools and colleges devoted to her education and in the outside clubs organized for athletic purposes. Every form of athletic culture is now enthusiastically practiced by young women. They are riding with the hounds, they are on the tonuis courts, they are fencing and bowling, they are riding horseback and bicycles, they are rowing boats and sailing yachts, and they are the admiring patrons of dag kennels and horse shows They have not invaded the prize ring because they are not brutes. Very few of them have organized with ball clubs or football toams, for there is a point where womanly dignity must stop, though one of the leading agitators for female physical culture in England is a zealous advocate of football as a ladylike accomplishment

in all this there is great hope for the new woman. The girls of today are likely to become the new women of the new century. If they expect to hold their own on terms of anything like equality with men a high degree of physical health and strength will be one of their chief requisites. But whether they do or not physical culture will not be a drawback. Clear hands, sound lungs, strong limbs and forms after the Venus de Milo order will add to their attractiveness as well as to their happiness. As it is probable populating the earth never will go out of fashion, it will be a gain all round if the coming generations are not handleapped in the race by the physical misfortune of hursdity -- Chicago Trib-
